**A Colonial Lexicon**
Nancy Rose Hunt 1999-11-15

A Colonial Lexicon is the first historical investigation of how childbirth became medicalized in Africa. Rejecting the “colonial encounter” paradigm pervasive in current studies, Nancy Rose Hunt elegantly weaves together stories about autopsies and bicycles, obstetric surgery and male initiation, to reveal how concerns about strange new objects and procedures fashioned the hybrid social world of colonialism and its aftermath in Mobutu’s Zaire. Relying on archival research in England and Belgium, as well as fieldwork in the Congo, Hunt reconstructs an ethnographic history of a remote British Baptist mission struggling to survive under the successive regimes of King Leopold II’s Congo Free State, the hyper-hygienic, pronatalist Belgian Congo, and Mobutu’s Zaire. After exploring the roots of social reproduction in rituals of manhood, she shows how the arrival of the fast and modern ushered in novel productions of gender, seen equally in the forced labor of road construction and the medicalization of childbirth.

Hunt focuses on a specifically interwar modernity, where the speed of airplanes and bicycles correlated with a new, mobile medicine aimed at curbing epidemics and enumerating colonial subjects. Fascinating stories about imperial masculinities, Christmas rituals, evangelical humor, colonial terror, and European cannibalism demonstrate that everyday life in the mission, on plantations, and under a strongly Catholic colonial state was never quite what it seemed. In a world where everyone was living in translation, privileged access to new objects and technologies allowed a class of “colonial middle figures”—particularly teachers, nurses, and midwives—to mediate the evolving hybridity of Congolese society. Successfully blurring conventional distinctions between precolonial, colonial, and postcolonial situations, Hunt moves on to discuss the unexpected presence of colonial fragments in the vibrant world of today’s postcolonial Africa. With its close attention to semiotics as well as sociology, A Colonial Lexicon will interest specialists in anthropology, African history, obstetrics and gynecology, medical history, religion, and women’s and cultural studies.

**Sous-estimation de soi et contraintes au succès** Bruno T. Mukendi 2015-01-01 Cet ouvrage discute de la problématique de la sous-estimation de soi et de ses conséquences tant sur le plan de la vie privée que publique. Il examine ensuite des stratégies opérationnelles pour forger un mental de champion et réussir les projets de transformation socio-économique. Il remet finalement en question les attitudes qui empêchent les Africains de répondre plus efficacement aux défis posés par la globalisation, la pauvreté, la marginalisation et le sous-développement persistant.

*Public-private Partnership Projects in Infrastructure* Jeffrey Delmon 2011 Investment in infrastructure is critical to economic growth, quality of life, poverty reduction, access to education, healthcare, and achieving many of the goals of a robust economy. But infrastructure is difficult for the public sector to get right. Public-private partnerships (PPPs) can help; they provide more efficient procurement, focus on consumer satisfaction and life cycle maintenance, and provide new sources of investment, in particular through limited recourse debt. But PPPs present challenges of their own. This book provides a practical guide to PPPs for policy makers and strategists, showing how governments can enable and encourage PPPs, providing a step-by-step analysis of the development of PPP projects, and explaining how PPP financing works, what PPP contractual structures look like, and how PPP risk allocation works in practice. It includes specific discussion of each infrastructure sector, with a focus on the strategic and policy issues essential for successful development of infrastructure through PPPs.

*The 1949 Geneva Conventions* Andrew Clapham 2015-10-15 The four Geneva Conventions, adopted in 1949, remain the fundamental basis of contemporary international humanitarian law. They protect the wounded and sick on the battlefield, those wounded, sick or shipwrecked at sea, prisoners of war, and civilians in time of war. However, since they were adopted warfare has changed considerably. In this groundbreaking commentary over sixty international law experts investigate the application of the Geneva Conventions and explain how they should be interpreted today. It places the Conventions in the light of the developing obligations imposed by international law on states, armed groups, and individuals, most notably through international human rights law and international criminal law. The context in which the Conventions are to be applied and interpreted has changed considerably since they were first written. The borderline between international and non-international armed conflicts is not as clear-cut as was once thought, and is complicated further by the use of armed force mandated by the United Nations and the complex mixed and transnational nature of certain non-international armed conflicts. The influence of other developing branches of international law, such as human rights law and refugee law has been considerable. The development of international criminal law has breathed new life into multiple provisions of the Geneva Conventions. This commentary adopts a thematic approach to provide detailed analysis of each key issue dealt with by the Conventions, taking into account both judicial decisions and state practice. Cross-cutting chapters on issues such as transnational conflicts and the geographical scope of the Conventions also give readers a full understanding of the meaning of the Geneva Conventions in their contemporary context. Prepared under the auspices of the Geneva Academy of International Humanitarian Law and Human Rights, this commentary on four of the most important treaties in international law is unmissable for anyone working in or studying situations of armed conflicts.

*Global Visions* Jean Fisher 1994-01-01 This anthology of papers, presented at the INIVA symposium in London in April 1994, presents a critique of notions of internationalism, the role of curatorial practice, the modern museum and art history, particularly in relation to the debates on cultural identity and difference, and the nature of innovation in visual culture at the end of the millennium.

*Parables and Fables* V. Y. Mudimbe 1991 Winner of the 2014 Brittingham Prize in Poetry, selected by Naomi Shihab Nye The word tyrant carries negative connotations, but in this new collection, Joanne Diaz tries to understand what makes tyranny so compelling, even seductive. These dynamic, funny, often poignant poems investigate the nature of tyranny in all of its forms political, cultural, familial, and erotic. Poems about Stalin, Lenin, and Castro appear beside poems about deeply personal histories. The result is a powerful exploration of desire, grief, and loss in a world where private relationships are always illuminated and informed by larger, more despotic forces. Winner,

An Outpost of Progress Illustrated Joseph Conrad 2021-04-05 "An Outpost of Progress" is a short story written in July 1896[1] by Joseph Conrad, drawing on his own experience at Congo. It was published in the magazine Cosmopolitan in 1897 and was later collected in Tales of Unrest in 1898. Conrad in 1900 contributed this story to “The Ladysmith Treasury," to provide aid to English citizens besieged in Ladysmith, South Africa, during the Boer War. Often compared with Heart of Darkness, Conrad considered it his best tale, owing to its "scrupulousness of tone" and "severity of discipline".

Elements of War Crimes Under the Rome Statute of the International Criminal Court 2003-03-27

This commentary provides a critical insight into the negotiating history that led to the adoption of the elements of war crimes. It also presents existing jurisprudence, which is relevant for the interpretation of the war crimes in the ICC Statute. The aim is to serve as a tool in the implementation of international humanitarian law in future cases dealing with war crimes and offer practitioners (judges, prosecutors and lawyers) and academics important background information on the substance of the crimes.

Fault Lines Gilane Tawadros 2003

Excavations at Ed-Dur (Umm Al-Qaiwain, United Arab Emirates) David Whitehouse 1998 Located on the coast of the Emirate of Umm al-Qaiwain (UAE), the site of Ed-Dur is without doubt the largest coastal site of the late 1st. cent. B.C. - 1st cent. A.D. between Qatar and the promontory of Musandam. It could have been the site of Ommana, mentionned as a harbour, by Classical authors. In 1986 a European consortium of four countries (Belgium, Denmark, France and Great Britain) was created in order to launch full scale excavations at this site in SE-Arabia. A team from Ghent University was active there, on a yearly basis, until 1995. During these 9 seasons numerous architectural remains and objects were discovered. In the present volume 121 tombs, with their burial goods, are published in full. All tombs and objects are presented in drawings and photographs, so as to provide a quick release of the discoveries. Different types of graves were found, from plain individual tombs to rectangular cists and large semi-subterranean multiple tombs covered by a barrel vault and accessible via an entrance, occasionally with stairs. However, a large above-ground grave was equally discovered. Although mostly plundered, several undisturbed tombs of different type were found, containing numerous objects.

Mining in Africa Bonnie Campbell 2009-06-15 The continent of Africa is rich in minerals needed by Western economies, but rather than forming the basis for economic growth the mining industry
Contributes very little to African development. Investigating the impact of the 2003 Extractive Industries Review on a number of African countries, the contributors find the root of the problem in the controls imposed on the African countries by the IMF and World Bank. They aim to convince academics, governments and industry that regulation needs to be reformed to create a mining industry favourable towards social, economic and environmental development. The book takes a multidisciplinary approach and provides a historical perspective of each country, making it ideal for students of development studies and development organizations.

Globalization, Neo-conservative Policies, and Democratic Alternatives
John Loxley 2005
Over the course of the last two decades, governments around the world implemented a fundamental shift in the mainstream economic policy and ushered in a period of globalization. These changes, which are commonly known as "neo-conservative," were resisted by a range of social forces, from workers to farmers, in the universities and on the streets. With its diverse international perspectives of globalization and formulations of alternative economic policies, this volume of essays responds to and posits alternatives for the uncreative and unjust policy decisions of world governments that negatively affect the welfare of the world's indigent people. This book's unifying theme is the principle of social justice that motivates Loxley's life and work. Loxley, an economist, is perhaps best known for his work in South Africa (as an advisor to Nelson Mandela during the transition from apartheid) and with First Nations communities in his native Canada. Many of the 19 essays explore the impact of globalization on the developing world, particularly Africa. A comprehensive and expansive exploration of the global impact of neo-conservative economic policies from an internationally diverse group of scholarly voices.

My Dark Companions and Their Strange Stories
Henry M. Stanley 2022-08-10
The nightly custom of gathering around the campfire, and entertaining one another with stories, began in 1875, after Sabadu, a page of King Mtesa, had astonished his hearers with the legend of the "Blameless Priest." Our circle was free to all, and was frequently well attended; for when it was seen that the more accomplished narrators were suitably rewarded, and that there was a great deal of amusement to be derived, few could resist the temptation to approach and listen, unless fatigue or illness prevented them.

News at Work
Pablo J. Boczkowski 2010-09-15
Before news organizations began putting their content online, people got the news in print or on TV and almost always outside of the workplace. But nowadays, most of us keep an eye on the headlines from our desks at work, and we have become accustomed to instant access to a growing supply of constantly updated stories on the Web. This change in the amount of news available as well as how we consume it has been coupled with an unexpected development in editorial labor: rival news organizations can now keep tabs on the competition and imitate them, resulting in a decrease in the diversity of the news. Peeking inside the newsrooms where journalists create stories and the work settings where the public reads them, Pablo J. Boczkowski reveals why journalists contribute to the growing similarity of news—even though they dislike it—and why consumers acquiesce to a media system they find increasingly dissatisfying. Comparing and contrasting two newspapers in Buenos Aires with similar developments in the United States, News at Work offers an enlightening perspective on living in a world with more information but less news.

Private Sector Investment in Infrastructure
Jeffrey Delmon 2009
This book provides a practical guide to public-private participation (PPP), how governments can enable and encourage PPP, step by step analysis of the development of PPP projects, how PPP financing works, what PPP contractual structures look like and most importantly how PPP risk allocation works in practice, including specific discussion of each infrastructure sector. It will be of interest to policy makers and strategists.

Principles of International Criminal Law
Gerhard Werle 2014
Principles of International Criminal Law is one of the leading textbooks in the field. This third edition builds on the highly-successful work of the previous editions, setting out the general principles governing international crimes as well as the fundamentals of both substantive and procedural international criminal law.
Mining, Society, and a Sustainable World  Jeremy Richards 2009-09-18 This is the first book of peer-reviewed, edited papers that examines the minerals industry in relation to sustainable development. The book takes a proactive, positivist, and solution-oriented approach, while not shying away from the fundamental problems. The History of Congo  Didier Gondola 2002-12-30 This book begins with a survey of Congo's early history, when diverse peoples such as the Luba, the Kuba, and the Nilotic inhabited the area, and continues by tracing the country's history through the Belgian period of colonisation and the dictatorships of Mobutu and Kabila. Biographical portraits present important figures in Congo's storied history. An annotated bibliography and chronology help make this the most current and accessible introduction to this fascinating, complex, and long-suffering nation. The Democratic Republic of Congo, formerly Zaire, is located at the center of Africa. The country encompasses the entire Congo River Basin, the potential source of 13% of the world's hydroelectric power. The Congo River Basin also contains one-third of Africa's rainforests, countless species of trees, and more than 10,000 species of flowering plants. Congo contains extremely valuable deposits of diamonds and coltan, a metal used in high-tech machinery. Because of this abundance of natural resources, Congo has unfortunately been the site of colonial domination, repressive dictatorships, and internecine violence between rebel groups and neighboring countries. The QTRACER2 Program for Tracer-breakthrough Curve Analysis for Tracer Tests in Karstic Aquifers and Other Hydrologic Systems  Malcolm S. Field 2002 The Great Divestiture  Massimo Florio 2004 Using the tools of social cost-benefit analysis, Florio assesses the effect of privatization on consumers, taxpayers, firms, shareholders, and workers. Governance Without Government  James N. Rosenau 1992-03-26 A world government capable of controlling nation-states has never evolved, but governance does underlie order among states and gives direction to problems arising from global interdependence. This book examines the ideological bases and behavioural patterns of this governance without government. French Indo-China  Virginia McLean Thompson 1967-01-01 Report on the Teak Forests of Pegu  Sir Dietrich Brandis 1860 Contested Justice  Christian De Vos 2015-12-18 An in-depth and interdisciplinary analysis of the politics and practice of the International Criminal Court. This title is also available as Open Access. Interprofessional Capability Framework  HIpE 2011 Project Finance, BOT Projects and Risk  Jeffrey Delmon 2005 Project and other structured finance models have become a method of choice for financing infrastructure projects in many different sectors across the globe. They allow greater flexibility for governments and project sponsors wishing to develop infrastructure without the concomitant burden on their balance sheets and their ability to fund other needs and priorities. However, the fall of Enron, WorldCom and so many other organisations who pushed the structured finance model one step too far has raised alarm bells. Has project and structured finance seen the end of its useful life? Are the risks surrounding such projects so extreme as to bring into question their usefulness? The viability of structured infrastructure projects relies on a comprehensive, yet sensible assessment of risk and allocation of that risk in an efficient manner. Yet our understanding of efficient risk allocation often runs contrary to the actual risk allocation models that we apply to such projects. Risk analysis for complex projects requires a level of sophistication and objectivity of which few individuals are capable. Jeff Delmon's book addresses the many issues around risk and structured infrastructure projects. It is not a dry legal treatise, but an eminently readable and practical explanation of efficient risk allocation and the contractual framework which forms the bedrock of BOT and other project finance transactions. Based on Jeff's practical experience in the sector, this book provides practical guidance and insight into many of the pitfalls often encountered in such projects. This book is ideal for those relatively new to the issues surrounding project finance and risk as well as those with significant experience as an aide-memoire and a challenge to the approaches to risk allocation that are so often applied to such transactions.
