The Common Law Tradition

George Liebmann 2017-09-04 This book commemorates a place and a time in American law teaching, but more importantly, an outlook: the common law tradition. That outlook was empirical and tolerant. These values were carried into expression by a group of people who were not part of a cult or faction nor ruled by the herd instinct. Now in paperback, The Common Law Tradition is a collective portrait of five scholars who epitomize the tradition. The focus is Chicago in the 1960s. The five figures considered--Edward H. Levi, Harry Kalven, Jr., Karl Llewellyn, Philip Kurland, and Kenneth Culp Davis--did much to broaden the perspectives of the legal academy. Levi made use of sociology, economics, and comparative law. Kalven collaborated with sociologists on the Jury Project and with economists on tax law and auto compensation plans. Llewellyn's commitment to empirical research underpinned his work on the Uniform Commercial Code. Kurland's approach to constitutional law was highlighted by his insistence on the relevance of legal history. Davis was an energetic comparativist in his work on administrative law. What distinguished these Chicagoans is that their work was practical and rooted in the law, and hence yielded concrete applications. The group's diversity, the tolerant atmosphere in which they taught and wrote, and the attachment of its individual members to empirical approaches differentiate them from today's legal scholars and make their ideas of continuing importance.

The Splendid Blond Beast

Christopher Simpson 2017-04-18 From a National Jewish Book Award–winning author: The “revelatory and shocking” investigation into the CIA’s liberation of Nazi war criminals (Kirkus Reviews). How did Gen, Karl Wolff, one of the highest-ranking members of the Nazi Party’s Waffen-SS, who personally oversaw the deportation of three hundred thousand Jews to the Treblinka extermination camps, escape prosecution at the Nuremberg trials? As revealed in this groundbreaking investigation—culled from recently uncovered archival documents—the answer lies within the US government, which buried reports on the Final Solution and was complicit in the recruitment of Nazi war criminals, all to protect the world economy. Among the key players was CIA director Allen Dulles, who was not only instrumental in Wolff’s exoneration but also responsible for installing former slave-labor specialists into positions of power in postwar Germany. In this damning exposé of American government malfeasance, author Christopher Simpson traces the roots of mass murder as an instrument of financial gain and state power, from the Armenian genocide during World War I to Hitler’s Holocaust through the practice of genocide today. Detailing how the existing structures of international law and commerce have encouraged mass killings, corporate looting, and profiteering at the expense of innocent victims, The Splendid Blond Beast is a disturbing and profound book about the success of evil in our time. The award-winning author of Blowback and Science of Coercion, Simpson also served as research director for Marcel Ophüls’s Oscar-winning documentary, Hôtel Terminus: The Life and Times of Klaus Barbie.

Neighborhood Futures

2017 "Two conflicting developments have recently characterized civic life in the United States. The first, the centralization of formal agencies of government, too often leads to diminishing political liberties and tyranny. The second, which is characterized by a greater amount of civic participation and individual self-actualization, is the formation of a whole new layer of sublocal institutions, both public and private. These include residential community and condominium associations; property owner-based business improvement districts in nearly all major cities;
neighborhood improvement districts in large cities; and even self-governing public schools. Neighborhood Futures is a realistic exploration of how, for a society to move forward and improve, its citizens must exercise the power to act creatively, and feel they are both competent and responsible individuals. Supporting his ideas with the Dutch innovation of the woonerf, or neighborhood street government, Liebmann follows through by discussing other foreign models of civic life forms and illustrating how they have resulted in resident satisfaction. George W. Liebmann is a partner of Liebmann & Shively, P.A., a Baltimore law firm that specializes in local government and education law. In addition to having served as a top aide to one of Maryland's governors, he is a former faculty associate of the Lincoln Institute of Land Policy, and is the author of Little Platoons and The Gallows in the Grove."--Provided by publisher.

**That Eminent Tribunal** Christopher Wolfe 2009-02-09 The role of the United States Supreme Court has been deeply controversial throughout American history. Should the Court undertake the task of guarding a wide variety of controversial and often unenumerated rights? Or should it confine itself to enforcing specific constitutional provisions, leaving other issues (even those of rights) to the democratic process? That Eminent Tribunal brings together a distinguished group of legal scholars and political scientists who argue that the Court's power has exceeded its appropriate bounds, and that sound republican principles require greater limits on that power. They reach this conclusion by an interesting variety of paths, and despite varied political convictions. Some of the essays debate the explicit claims to constitutional authority laid out by the Supreme Court itself in Planned Parenthood v. Casey and similar cases, and others focus on the defenses of judicial authority found commonly in legal scholarship (e.g., the allegedly superior moral reasoning of judges, or judges' supposed track record of superior political decision making). The authors find these arguments wanting and contend that the principles of republicanism and the contemporary form of judicial review exercised by the Supreme Court are fundamentally incompatible. The contributors include Hadley Arkes, Gerard V. Bradley, George Liebmann, Michael McConnell, Robert F. Nagel, Jack Wade Nowlin, Steven D. Smith, Jeremy Waldron, Keith E. Whittington, Christopher Wolfe, and Michael P. Zuckert.

American's Political Inventors George W. Liebmann 2017-12-11 Recent American political developments, including the election of Donald Trump, reveal profound disquiet with the highly centralized political regime based on discretionary allocation of funds and powers to interest groups that has developed since the creation of emergency institutions after America's entry into World War I. This book demonstrates the effectiveness in American history of measures conceived in a different spirit, addressing the population at large, rather than particular interest groups, relying on citizen and local initiative, and founded not on the distribution of frequently unearned benefits and powers but on reciprocal contributions and obligations. George W. Liebmann discusses John Winthrop and his foundation of New England towns; John Locke and the creation of Southern plantations; Thomas Jefferson and his scheme for the organization of Northwestern townships and American territories and states; Joseph Pulitzer and the origins of municipal home rule; John Wesley Powell and the creation of reclamation districts; Hugh Hammond Bennett and the fostering of soil conservation districts; and Byron Hanke and the development of residential community associations. The book concludes with a number of public policy proposals relating to housing, urban renewal, care of the elderly, immigration and youth unemployment conceived in the same spirit. Liebmann brings to light little-known facts concerning the growth of practices and institutions that Americans take for granted. His book will be of interest to students of biography, history and government.

The Gallows in the Grove George Liebmann 1997-10-28 A summary of the alarming effects of well-intentioned constitutional doctrines that have blighted local and voluntary initiative and given rise to sterile and increasingly lawless national politics; and a description of many of the hopeful developments in public policy that will be possible if more restrained judicial policies are adopted.

The Unbounded Home Lee Anne Fennell 2009-09-01 Lee Anne Fennell explores the relationship between home ownership and neighbourhood, arguing that the desire for active participation in local affairs is directly linked to concern about property values. She looks at how critical issues of neighbourhood control & community composition might be addressed through this link.

Rehabilitating Lochner David E. Bernstein 2011-05-01 In this timely reevaluation of an infamous Supreme Court decision, David E. Bernstein provides a compelling survey of the history and background of Lochner v. New York. This 1905 decision invalidated state laws limiting work hours and became the leading case contending that novel economic regulations were unconstitutional. Sure to be controversial, Rehabilitating Lochner argues that the decision was well grounded in precedent—and that modern constitutional jurisprudence owes at least as much to the limited-government ideas of Lochner proponents as to the more expansive vision of its Progressive opponents. Tracing the influence of this decision through subsequent battles over segregation laws, sex discrimination, civil liberties, and more, Rehabilitating Lochner argues not only that the court acted reasonably in Lochner, but that Lochner and like-minded cases have been widely misunderstood and unfairly maligned ever since.

The Last American Diplomat George W. Liebmann 2012-01-27 Can John D. Negroponte be described as 'The Last American Diplomat'? In a career spanning 50 years of unprecedented American global power, he was the last of a dying breed of patrician diplomats - devoted to public service, a self-effacing and ultimate insider, whose prime duty was to advise, guide and warn - a bulwark of traditional diplomatic realism against ideologue excess. Negroponte served as US ambassador to Honduras, Mexico, the Philippines and Iraq; he was US Permanent Representative to the UN, Director of National Intelligence and Deputy Secretary of State to George W. Bush. His was a high-flying and seemingly conventional career but one full of...
surprises. Negroponte opposed Kissinger in Vietnam, supported a 'proxy war' but opposed direct American military action against Marxists in Central America - facing bitter Congress opposition in the process. He swam against the floodtide of George W. Bush's neocon-dominated administration, warning against the Iraq war as a possible new 'Vietnam' and criticising aspects of Bush's 'War on Terror'. He disconcerted the administration by arguing that the re-establishment of Iraq would take as long as five years. And he was influential in international social and economic policy - working for the successful re-settlement of millions of refugees in Southeast Asia following the Vietnam War, issuing early warnings about the scourge of AIDS in Africa and successfully launching the North American Free Trade Agreement (NAFTA). George W. Liebmann's incisive account is based on personal and shared experience but it is no hagiography; beyond the author's discussions with Negroponte, this book is deeply researched in US state papers and includes interviews with leading actors. It will provide fascinating reading for anyone interested in the inside-story of American diplomacy, showing personal and policy struggles, and the underlying fissures present even in the world's last remaining superpower.

**Solving Problems WithoutLarge Government** George Liebmann 2000-04-30 Solving Problems Without Large Government circumvents sterile discussions of federalism and privatization by discussing the potential role of sub-local government-assisted entities in providing effective and fair access to services. Some readers will be astonished at the numerous examples of vital social functions which have already been handled at this level, in a variety of societies throughout history. The proper use of small institutions, Liebmann argues, can actually serve to foster greater economic equity and political power.

**The Little Platoons** George Liebmann 1995-06-27 The Little Platoons examines sub-local government—the small-scale structures of civil society that lie between the individual and large governmental actors—in England, France, Germany, the United States, Russia, China, and Japan. The work examines community councils, educational districts, neighborhood organizations, and the like, as seen in various societies in the modern age. And, in
identifying common attributes of these civil and societal organizations, the work has particular relevance—and indeed makes ameliorative recommendations—for the problems of our modern cities. In a period of dissatisfaction with a self-regarding and centralized political class and with both market and bureaucratic institutions, Liebmann’s thoughtful analysis of community and civil organization in a variety of societies and traditions broadens our understanding of comparative politics and sociology, urban planning, and state and local government.

**The President’s Czars** Mitchel A. Sollenberger 2012-04-27 Faced with crises that would challenge any president, Barack Obama authorized "pay czar" Kenneth Feinberg to oversee the $20 billion fund for victims of the BP oil spill and to establish—and enforce—executive pay guidelines for companies that received $700 billion in federal bailout money. Feinberg’s office comes with vastly expansive policy powers along with seemingly deep pockets; yet his position does not formally fit anywhere within our government's constitutional framework. The very word "czar" seems inappropriate in a constitutional republic, but it has come to describe any executive branch official who has significant authority over a policy area, works independently of agency or Department heads, and is not confirmed by the Senate or subject to congressional oversight. Mitchel Sollenberger and Mark Rozell provide the first comprehensive overview of presidential czars, tracing the history of the position from its origins through its initial expansion under FDR and its dramatic growth during the presidencies of George W. Bush and Barack Obama. The President's Czars shows how, under pressure to act on the policy front, modern presidents have increasingly turned to these appointed officials, even though by doing so they violate the Appointments Clause and can also run into conflict with the nondelegation doctrine and the principle that a president cannot unilaterally establish offices without legislative support. Further, Sollenberger and Rozell contend that czars not only are ill-conceived but also disrupt a governing system based on democratic accountability. A sobering overview solidly grounded in public law analysis, this study serves as a counter-argument to those who would embrace an excessively powerful presidency, one with relatively limited constraints. Among other things, it proposes the restoration of accountability—starting with significant changes to Title 3 of the U.S. Code, which authorizes the president to appoint White House employees "without regard to any other provision of law." Ultimately, the authors argue that czars have generally not done a good job of making the executive branch bureaucracy more effective and efficient. Whatever utility presidents may see in appointing czars, Sollenberger and Rozell make a strong case that the overall damage to our constitutional system is great—and that this runaway practice has to stop.

**Six Lost Leaders** George W. Liebmann 2001 In his new book, George W. Liebmann discusses the work of six largely forgotten figures: Octavia Hill, William Glyn-Jones, Mary Richmond, George William Brown, Mary Parker Follet, and Bryan Keith-Lucas. Three are British; three American. Some came from affluent backgrounds; some grew up poor. One was barely educated; another spent eleven years at some of the world’s more prestigious institutions of higher learning. What united them all was a shared conviction that citizenship involved more than voting, that society consists of more than the marketplace or political institutions, and that professional values are important for shaping a civil discourse. With a sympathetic eye toward the fulfillment of these common aspirations, Liebmann looks at the national health, social work, housing management, and educational initiatives spearheaded by these powerful figures over the past two centuries. This study is a fascinating retort to our cynical age of political disillusionment and
an innovative contribution to social and political history.

**Diplomacy Between the Wars** George W. Liebmann 2019-07-25 "Diplomacy Between the Wars" is a detailed inside story of diplomacy seen through the careers of five remarkable career diplomatists. Here is a unique and authentic picture of practical diplomacy and its effect during periods of international crisis which shaped the twentieth century. These were not the statesmen and politicians who dominated the international stage but practical diplomats with long experience, linguistic competence, deep knowledge of the local conditions, history, culture and of the people of the countries where they served. George Liebmann also brings acute political awareness to the subject. The achievements of these diplomats - often unsung during their careers and gleaned largely from history books - were considerable and a monument to practical, professional diplomacy. Lewis Einstein was influential in demonstrating the central role - and its control - of finance and credit in modern wars and urging massive US economic assistance to Europe and after World War II providing the intellectual underpinnings of the Marshall Plan; Sir Horace Rumbold's work was vital in avoiding war between Great Britain and Turkey and in warnings of the dangers of Hitler; Johann von Bernstorff opposed Germany's 'naval militarism', supported a negotiated end to the First World War and peaceful revision of the Treaty of Versailles; Count Carlo Sforza urged restraint on Italy's territorial ambitions and tolerance for former Fascists and Communists; and Ismet Inonu kept Turkey out of war, preserved her national interest at the Treaty of Lausanne and maintained friendship with the great powers. He worked for religious toleration and the limitation of dictatorship in Ataturk's secular Turkish Republic.

**The Unmaking of Fascist Aesthetics** Kriss Ravetto 2001 In works by filmmakers from Bertolucci to Spielberg, debauched images of nazi and fascist eroticism, symbols of violence and immorality, often bear an uncanny resemblance to the images and symbols once used by the fascists themselves to demarcate racial, sexual, and political others. This book exposes the "madness" inherent in such a course, which attests to the
impossibility of disengaging visual and rhetorical constructions from political, ideological, and moral codes. Kriss Ravetto argues that contemporary discourses using such devices actually continue unacknowledged rhetorical, moral, and visual analogies of the past. Against postwar fictional and historical accounts of World War II in which generic images of evil characterize the nazi and the fascist, Ravetto sets the more complex approach of such filmmakers as Pier Paolo Pasolini, Liliana Cavani, and Lina Wertmüller. Her book asks us to think deeply about what it means to say that we have conquered fascism, when the aesthetics of fascism still describe and determine how we look at political figures and global events.
