World Development Report 2019 World Bank 2018-10-31 Work is constantly reshaped by technological progress. New ways of production are adopted, markets expand, and societies evolve. But some changes provoke more attention than others, in part due to the vast uncertainty involved in making predictions about the future. The 2019 World Development Report will study how the nature of work is changing as a result of advances in technology today. Technological progress disrupts existing systems. A new social contract is needed to smooth the transition and guard against rising inequality. Significant investments in human capital throughout a person’s lifecycle are vital to this effort. If workers are to stay competitive against machines they need to train or retool existing skills. A social protection system that includes a minimum basic level of protection for workers and
citizens can complement new forms of employment. Improved private sector policies to encourage startup activity and competition can help countries
compete in the digital age. Governments also need to ensure that firms pay their fair share of taxes, in part to fund this new social contract. The 2019
World Development Report presents an analysis of these issues based upon the available evidence.

*Activity Analysis* Gayle Ilene Hersch 2005 To respond to the renewed focus by the occupational therapy profession upon occupation, the fifth edition
of Activity Analysis and Application has been updated and renamed to reflect this latest emphasis. While Activity Analysis: Application to Occupation,
Fifth Edition maintains the sequential process of learning activity analysis, this step-by-step approach now helps students analyze activity for the
purpose of optimizing the client’s occupational performance. Gayle Hersch, Nancy Lamport, and Margaret Coffey successfully guide students through
the development of clinical reasoning skills critical to planning a client’s return to meaningful engagement in valued occupations. The authors utilize
a straightforward teaching approach that allows students to progress developmentally in understanding both the analysis and application of activity
to client intervention. The Occupational Therapy Practice Framework: Domain and Process, with a prominent focus on occupation as this profession’s
philosophical basis for practice, has been incorporated in the updated forms and explanations of the activity analysis approach. Activity Analysis:
Application to Occupation, Fifth Edition is a worthy contribution to the professional education of occupational therapists in furthering their
understanding and application of activity and occupation. Features: The newly titled Client-Activity Intervention Plan that synthesizes the activity
analysis into client application. Objectives at the beginning of each unit. Discussion questions and examples of daily life occupations. A Web site
including 5 forms where students and practitioners can download and print information for class assignments and clinical settings.

The Historical Archaeology of Virginia from Initial Settlement to the Present Clarence R. Geier 2017-02-10 The book includes six chapters that cover Virginia history from initial settlement through the 20th century plus one that deals with the important role of underwater archaeology. Written by prominent archaeologists with research experience in their respective topic areas, the chapters consider important issues of Virginia history and consider how the discipline of historic archaeology has addressed them and needs to address them. Changes in research strategy over time are discussed, and recommendations are made concerning the need to recognize the diverse and often differing roles and impacts that characterized the different regions of Virginia over the course of its historic past. Significant issues in Virginia history needing greater study are identified.

Active Learning Charles C. Bonwell 1991 This monograph examines the nature of active learning at the higher education level, the empirical research on its use, the common obstacles and barriers that give rise to faculty resistance, and how faculty and staff can implement active learning techniques. A preliminary section defines active learning and looks at the current climate surrounding the concept. A second section, entitled "The Modified Lecture," offers ways that teachers can incorporate active learning into their most frequently used format: the lecture. The following section on classroom discussion explains the conditions and techniques needed for the most useful type of exchange. Other ways to promote active learning are also described including: visual learning, writing in class, problem solving, computer-based instruction, cooperative learning, debates, drama, role playing, simulations, games, and peer teaching. A section on obstacles to implementing active learning techniques leads naturally to the final section, "Conclusions and Recommendations," which outlines the roles that each group within the university can play in order to encourage the
implementation of active learning strategies. The text includes over 200 references and an index. (JB)

A Guide to the Formulation of Plans and Goals in Occupational Therapy Sue Parkinson 2020-11-29 This practical guide for occupational therapists introduces a tried and tested method for moving from assessment to intervention, by formulating plans and measurable goals using the influential Model of Human occupation (MOHO). Section 1 introduces the concept of formulation - where it comes from, what it involves, why it is important, and how assessment information can be guided by theoretical frameworks and organised into a flowing narrative. Section 2 provides specific instructions for constructing occupational formulations using the Model of Human Occupation. In addition, a radically new way for creating aspirational goals is introduced - based on a simple acronym - which will enable occupational therapists to measure sustained changes rather than single actions. Section 3 presents 20 example occupational formulations and goals, from a wide range of mental health, physical health and learning disability settings, as well as a prison service, and services for homeless people and asylum seekers. Designed for practising occupational therapists and occupational students, this is an essential introduction for all those who are looking for an effective way to formulate plans and goals based on the Model of Human Occupation.

**The Social Life of Coffee** Brian Cowan 2008-10-01 What induced the British to adopt foreign coffee-drinking customs in the seventeenth century? Why did an entirely new social institution, the coffeehouse, emerge as the primary place for consumption of this new drink? In this lively book, Brian Cowan locates the answers to these questions in the particularly British combination of curiosity, commerce, and civil society. Cowan provides the definitive account of the origins of coffee drinking and coffeehouse society, and in so doing he reshapes our understanding of the commercial and consumer revolutions in Britain during the long Stuart century. Britain’s virtuosi, gentlemanly patrons of the arts and sciences, were profoundly interested in things strange and exotic. Cowan explores how such virtuosi spurred initial consumer interest in coffee and invented the social template for the first coffeehouses. As the coffeehouse evolved, rising to take a central role in British commercial and civil society, the virtuosi were also transformed by their own invention.

**The Case for Marriage** Linda Waite 2002-03-05 A groundbreaking look at marriage, one of the most basic and universal of all human institutions, which reveals the emotional, physical, economic, and sexual benefits that marriage brings to individuals and society as a whole. The Case for Marriage is a critically important intervention in the national debate about the future of family. Based on the authoritative research of family sociologist Linda J. Waite, journalist Maggie Gallagher, and a number of other scholars, this book’s findings dramatically contradict the anti-marriage myths that have become the common sense of most Americans. Today a broad consensus holds that marriage is a bad deal for women, that divorce is better for children when parents are unhappy, and that marriage is essentially a private choice, not a public institution. Waite and Gallagher flatly contradict these assumptions, arguing instead that by a broad range of indices, marriage is actually better for you than being single or divorced.
physically, materially, and spiritually. They contend that married people live longer, have better health, earn more money, accumulate more wealth, feel more fulfillment in their lives, enjoy more satisfying sexual relationships, and have happier and more successful children than those who remain single, cohabit, or get divorced. The Case for Marriage combines clearheaded analysis, penetrating cultural criticism, and practical advice for strengthening the institution of marriage, and provides clear, essential guidelines for reestablishing marriage as the foundation for a healthy and happy society. “A compelling defense of a sacred union. The Case for Marriage is well written and well argued, empirically rigorous and learned, practical and commonsensical.” -- William J. Bennett, author of The Book of Virtues “Makes the absolutely critical point that marriage has been misrepresented and misunderstood.” -- The Wall Street Journal www.broadwaybooks.com

**Qualitative Content Analysis in Practice** Margrit Schreier 2012-02-21 Qualitative content analysis is a powerful method for analyzing large amounts of qualitative data collected through interviews or focus groups. It is frequently employed by students, but introductory textbooks on content analysis have largely focused on the quantitative version of the method. In one of the first to focus on qualitative content analysis, Margrit Schreier takes students step-by-step through: - creating a coding frame - segmenting the material - trying out the coding frame - evaluating the trial coding - carrying out the main coding - what comes after qualitative content analysis - making use of software when conducting qualitative content analysis. Each part of the process is described in detail and research examples are provided to illustrate each step. Frequently asked questions are answered, the most important points are summarized, and end of chapter questions provide an opportunity to revise these points. After reading the book, students are fully equipped to conduct their own qualitative content analysis. Designed for upper level undergraduate, MA, PhD students and researchers across the social sciences, this is essential reading for all those who want to use qualitative content analysis.

**Getting the message through: A Branch History of the U.S. Army Signal Corps** Rebecca Robbins Raines 1996 Getting the Message Through,
the companion volume to Rebecca Robbins Raines' Signal Corps, traces the evolution of the corps from the appointment of the first signal officer on the eve of the Civil War, through its stages of growth and change, to its service in Operation DESERT SHIELD/DESERT STORM. Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology, but also such diverse missions as weather reporting and military aviation. Information dominance in the form of superior communications is considered to be sine qua non to modern warfare. As Raines ably shows, the Signal Corps--once considered by some Army officers to be of little or no military value--and the communications it provides have become integral to all aspects of military operations on modern digitized battlefields. The volume is an invaluable reference source for anyone interested in the institutional history of the branch.

**The Allure of Toxic Leaders** Jean Lipman-Blumen 2006 Toxic leaders, both political, like Slobodan Milosevic, and corporate, like Enron's Ken Lay, have always been with us, and many books have been written to explain what makes them tick. Here leadership scholar Jean Lipman-Blumen explains what makes the followers tick, exploring why people will tolerate--and remain loyal to--leaders who are destructive to their organizations, their employees, or their nations. Why do we knowingly follow, seldom unseat, frequently prefer, and sometimes even create toxic leaders? Lipman-Blumen argues that these leaders appeal to our deepest needs, playing on our anxieties and fears, on our yearnings for security, high self-esteem, and significance, and on our desire for noble enterprises and immortality. She also explores how followers inadvertently keep themselves in line by a set of insidious control myths that they internalize. For example, the belief that the leader must necessarily be in a position to "know more" than the followers often stills their objections. In addition, outside forces--such as economic depressions, political upheavals, or a crisis in a company--can increase our anxiety and our longing for charismatic leaders. Lipman-Blumen shows how followers can learn critical lessons for the future and survive in the meantime. She discusses how to confront, reform, undermine, blow the whistle on, or oust a toxic leader. And she suggests how we can diminish our need for strong leaders, identify "reluctant leaders" among competent followers, and even nurture the leader within ourselves. Toxic leaders charm, manipulate, mistreat, weaken, and ultimately devastate their followers. The Allure of Toxic Leaders tells us how to recognize these leaders before it's too late.
